Lake Region Medical Launches DevicePlus™ Medical Device Solutions

CHASKA, MN – Lake Region Medical, a contract and OEM manufacturer of medical devices and components, announced the launch of DevicePlus Medical Device Solutions, a development and manufacturing service devoted to medical device design, prototyping and development with support from engineering, regulatory and product development.

DevicePlus offers a wide range of outsourcing solutions from concept development prototyping to scale-up manufacturing and dock-to-stock supply chain management. Manufacturing capabilities range from unifilar coiling to implantable machined components to custom-assembled and packaged intricate Class III devices.

“Customers rely on Lake Region Medical’s industry knowledge, technical expertise, product and process development, project management, superior quality and full regulatory support for their medical device needs,” said Mark G. Fleischhacker, President, COO. “DevicePlus delivers unique and robust service solutions that increase value to our customers.”

Details on DevicePlus and Lake Region Medical’s range of medical device manufacturing capabilities are available on Lake Region Medical’s website, www.lakeregionmedical.com.

About Lake Region Medical

Lake Region Medical is a global leader in OEM and contract manufacturing of wire formed medical devices and components for the world’s largest medical device companies. Lake Region Medical specializes in minimally invasive devices for cardiovascular, endovascular and neurovascular applications and serves all major markets worldwide.

This focus is supported by a comprehensive range of 510(k) registered OEM delivery and access products along with several coating and material enhancement options. From concept development prototyping to scale-up manufacturing and dock-to-stock supply chain management, Lake Region Medical provides a wide range of turnkey solutions. Customers rely on Lake Region Medical’s market expertise, technical capabilities, product and process development, project management, superior quality and full regulatory support for their medical device requirements.
